Business Hours & Holidays

Explanation: Defined the standard working hours for the admissions office and the official academic calendar holidays. This ensures that automated processes, such as applicant

notifications and task reminders, only occur during operational periods.

Salesforce Path: Setup > Business Hours and Setup > Holidays

Final Configuration:

- **Business Hours:** Mon-Fri, 9:00 AM - 5:00 PM
- **Holidays:** Specific dates added for academic semester breaks and festivals.

Profiles & Roles

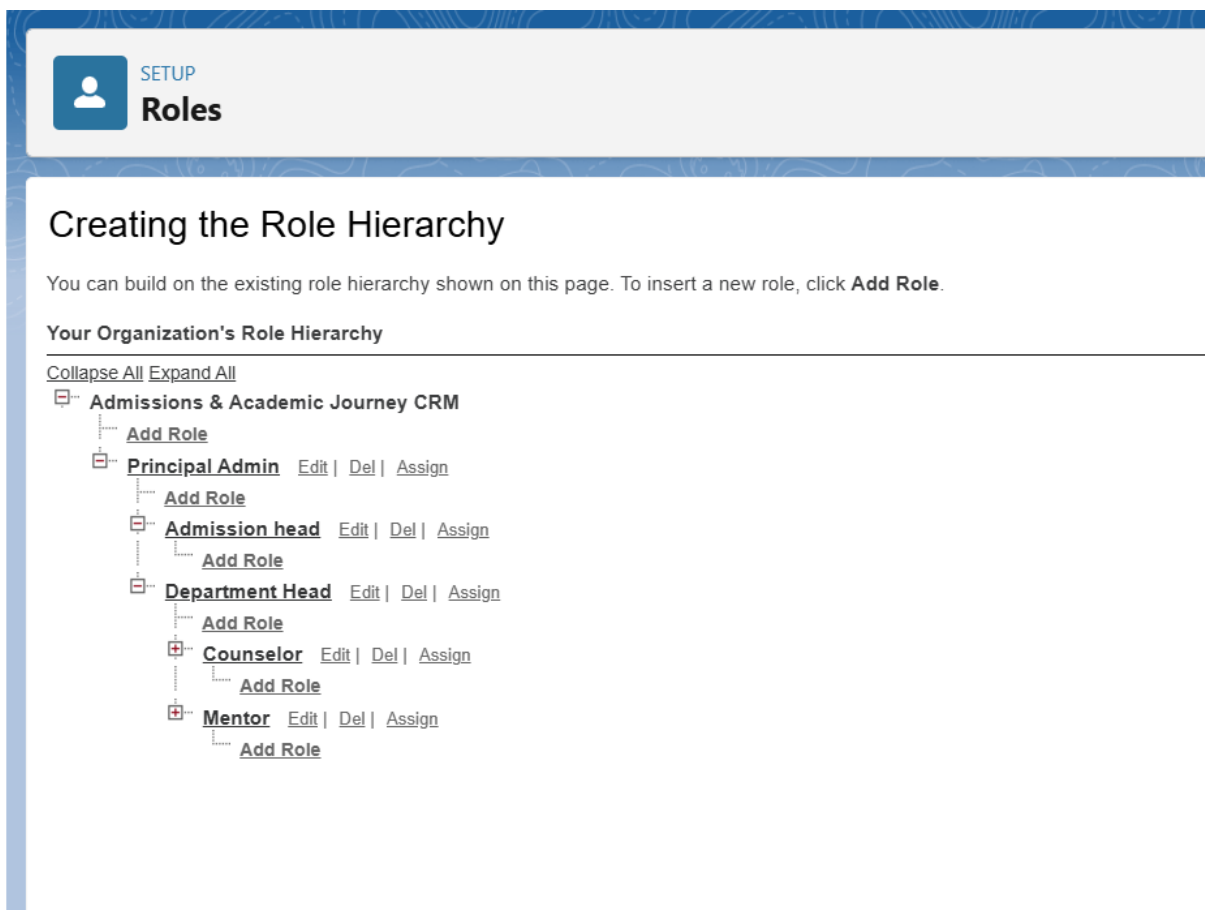

Explanation: Defined user permissions and data visibility to protect sensitive student information. **Profiles** control what a

user can *do* (e.g., edit an application), and **Roles** control what records they can *see* based on the organizational hierarchy.

Salesforce Path: Setup > Quick find > Profiles and roles.

Procedure:

1. **Profiles:** Cloned the Standard User profile to create custom profiles: Admissions head Profile, department head Profile, Counsellor, Mentor.
2. **Roles:** Principal admin, Admission head, Departmental head(Counsellor and mentor).

The screenshot shows the Salesforce 'Roles' setup page. At the top, there's a header with a user icon, the word 'SETUP', and the title 'Roles'. Below this, the main heading is 'Creating the Role Hierarchy'. A subtext explains: 'You can build on the existing role hierarchy shown on this page. To insert a new role, click **Add Role**.'

The section 'Your Organization's Role Hierarchy' displays a tree structure:

Organization-Wide Defaults (OWD) & Sharing Rules

Explanation: Set the baseline security for the org by making all student-related custom objects private to ensure data privacy and compliance. Sharing rules were then created as specific exceptions to this private setting to allow for necessary collaboration.

Salesforce Path: Setup > Quick find > Sharing Settings

OWD: Set the default internal access for the Academic record, Application, Student, Course, Counselling notes, Department, Prospective Student Custom Objects to private.

Prospective Student Sharing Rule

Use sharing rules to make automatic exceptions to your organization-wide sharing settings for defined sets of users.
Note: "Roles and subordinates" includes all users in a role, and the roles below that role.
You can use sharing rules only to grant wider access to data, not to restrict access.

Dev Org Setup & Deployment Basics

Explanation: This served as a conceptual checkpoint. It confirmed that the Developer Org is the single environment for building and testing all configurations in this phase. No additional configuration for login policies or deployment is required at this stage.

Procedure: No action was needed as all necessary configurations were already performed in the previous steps.
